

PRODUCT DESCRIPTION

Xtreme ANTIFREEZE -10 is a liquid ready for use for radiators and cooling circuits. Thanks to the corrosion inhibitor present, it can protect the materials that make up the circuit of cooling system. This product reaches a freezing temperature of – 10,0 °C.

Xtreme ANTIFREEZE -10 has the following characteristics:

- good properties antifoaming,
- good protection to corrosion.

APPLICATIONS

Xtreme ANTIFREEZE-10, is suitable where a G11 coolant is recommended by the vehicle manufacturer.

Xtreme ANTIFREEZE -10 presents the following benefits:

- increased durability and cleaning of the circuit,
- resistance to low temperatures

PERFORMANCE LEVELS AND APPROVALS

VW TL 744C (G11)
CUNA NC 956-16

TYPICAL CHARACTERISTICS

XTREME ANTIFREEZE-10	Testing procedure	Typical Values
Color	-	BLUE
Density @ 15°C, kgm ³	ASTM D-1122	1.025
Equilibrium Boiling Point, °C	ASTM D-1120	101,5
Freezing Point, °C	ASTM D-1177	-10
