

## PRODUCT DESCRIPTION

Xtreme GREENfreeze -40 is a liquid ready to use for radiators and cooling circuits. Thanks to the corrosion inhibitor present, it can protect the materials that make up the circuit of cooling system. This product reaches a freezing temperature of - 36.0 °C.

Xtreme GREENfreeze -40 has the following characteristics:

- good antifoaming properties,
- good protection to corrosion.

## APPLICATIONS

Xtreme GREENfreeze -40 is a coolant for cars, heavy duty and agricultural vehicles, boats, and stationary engines. It is suitable where a G12/ G12+ coolant is recommended by the vehicle manufacturer.

Xtreme GREENfreeze -40 presents the following benefits:

- increased durability and cleaning of the circuit,
- resistance to low temperatures

## PERFORMANCE LEVELS AND APPROVALS

VW TL 774 D/F (G12/ G12+)  
AUDI, MERCEDES; SEAT  
RENAULT 41-01-001/Q

## TYPICAL CHARACTERISTICS

Xtreme GREENfreeze-40	TESTING PROCEDURE	TYPICAL VALUES
Color	-	GREEN
Density @ 15°C, kgm <sup>3</sup>	ASTM D-1122	1.050 ÷ 1080
Equilibrium Boiling Point, °C	ASTM D-1120	104,5 ÷ 106,5
Freezing Point, °C	ASTM D-1177	≤ -36
